DocEnhance

PhD candidate: Learn how to handle your research data!

DocEnhance Data Stewardship Course

How do you best plan for the activities of collecting, storing, processing, analyzing and archiving your data?

How do you best structure your data to keep track of all data and all versions of your data?

How do you find existing data to add on to your own data?

The course covers:

- Planning
- Collecting
- Storing
- Processing
- Analyzing
- Archiving
- Structuring
- Finding
- Citing
- … and more

Module 1: video lectures

Start the course at your convenience by entering the online module with video lectures and additional resources.

Follow the videos, preferably in the given sequence.

Allow sufficient time to go carefully through the contents and assignments connected to each topic.

Once you have completed the course, you may proceed to the Exam section, where you can undertake a multiple choice test.

Module 1
- the online course -

Estimated workload: 16 hours

Module 2 and 3: workshops and assignments

Having finished Module 1 and passed the exam, you are entitled to move on to Module 2 and 3.

These modules are organized as workshops, and will give you hands-on training in research data stewardship.

Module 2 and 3
- workshops and assignments -

Estimated workload: 3 days
